

Headset options for 2018

Headsets with noise cancelling microphone are **essential** to the success of the project. In rare instances, schools have not invested in this equipment and this has significantly affected their ability to participate.

It is vital that schools purchase:

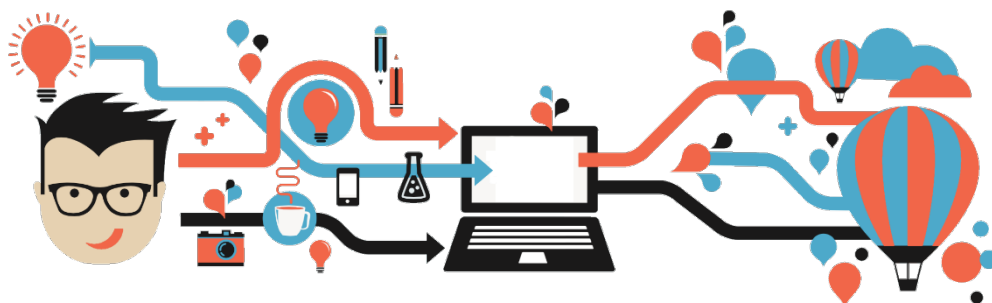

- one wireless headset for the Web Conference Supervisor
- one headset for **every** student (wireless not required)
- at least two spares for students

The Web Conference Supervisor needs a wireless headset so they can log in and support the students and online teacher. A **wireless headset** allows the supervisor to keep up with the lesson, communicate with the online teacher and move around the room to help students all at the same time. An entry level wireless headset costs about \$100. You don't need one that costs \$300!!

Every student must have their own headset with microphone for every web conference. A headset of reasonable quality costs \$20 to \$40 per unit and should include a noise cancelling microphone. Cheaper varieties are not suitable. Here are some tips:

- you must purchase at least 2 spares as a back-up
- please check if your computers have two ports or one port
- two ports means one for the speakers, one for the microphone
- one port means you only have a port for the speakers and therefore require headsets with USB connection
- a class set is an option if you have more than one group

Scroll down for suggested headset options.
